Why to use Air Purifiers?

Automobile
exhaust
emission

New house
decoration
pollution

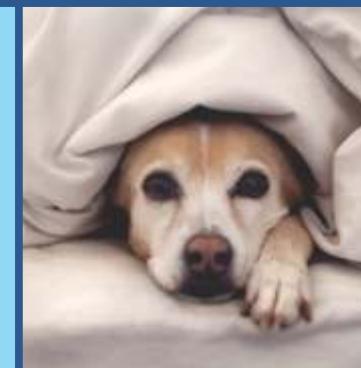

Industrial
waste gas
pollution

There are
smokers
at home

Because the air
is getting worse

Family Pet
Odors

Acarid in
the quilt

Floating
dust

Pollen
allergens

NextView was established in 2004 as a part of multidisciplinary NextTech Group. From then Nextview Technology has created a sense of excitement and interest in the smart LED TV industry with its superior technology and impeccable performance at par with international brands. Offering an enviable range in LED TV segment, Nextview is growing with leaps and bound since its inception. NextView has been recognised with its national presence and India's top 10 brand in Television Segment.

Founded by Mr. Nishith Mirani, having dual academic qualification of MCSE & Business Management, Nextview Technology heavily benefits from his deep technical and administration skills, vast knowledge and decade of experience.

With its young and dynamic leadership and refreshing vision towards innovation, Nextview has now introduced most advanced technology Air Purifiers. These Air Purifiers can be used to improve the quality of indoor air at Home, Offices, Educational Institutes, Hospitals, Hotels, Restaurants Etc.

We @ NextView are committed for achieving highest levels of customer's satisfaction by providing the finest quality products, quick services, economical and client-friendly solutions. Since its inception, the group has believed in building trust and association rather than selling products and thus, in the digital smart television domain Nextview has already created its distinct identity and it is now emerging as one of the most innovative brand in Air Purifiers Segment.

All our products are UL, CE and RoHS Certified

Vision

"NextView aims to revolutionize the Television and Air Purifier Industry by offering latest technology, smarter experiences and more richer and vibrant products at most affordable prices.

Ceaselessly working towards becoming a globally reckoned brand; Nextview through continuous evolution in its technology and innovation wishes to be synonymous with trust, quality and passion for the excellence in the Digital World.

Mission

"To establish an association built on trust, satisfaction, excellent service with our clients and foster a mutually rewarding, value driven atmosphere at work place for employees and vendors."

Values

- Customer Satisfaction
- Integrity
- Teamwork
- Trust
- Quality
- Longtime relationships

Director

Next View Technologies (India) Pvt Ltd.

**LOVE IS IN THE AIR,
PROVIDED IF IT IS **PURE!****

- Fresh Air
- Ultra Quiet Operation
- Releasing of Anions
- Remove PM2.5
- HEPA Filtering

(Best used for Car)

ANION GENERATOR

Release large amount of anion into the air by the ion discharge technology

DECOMPOSE BACTERIA

Take effect to the surface of bacteria, decompose and recombine its structure.

PRODUCE OXYGEN RICH WATER MOLECULE

Decomposing protein to form oxygen rich water molecules.

PRODUCT FEATURES

Intelligent PM2.5 Particle Sensor

360° Inlet Purifying

Touch Control Panel

Easy Plug and Play System

Advanced Purification Technology

Efficient and Low Noise

Model No.	NVKJ008F-K05A
Weight	250 GM
CADR	8 m³/h
Size (mm)	74*74*170mm
Voltage	DC 10-15V
Filter	HEPA Filter
Applicable Area	Car Air Purifier

HEPA HIGH PRECISION CYCLE PURIFICATION

Filtering particulate pollutants as small as 0.3 micron such as pollen, bacteria and viruses.

The filtration rate for particulate pollutants with 0.1 micron to 0.3 micron reach 99%. Effective removal of pollutants like smoke, dust, odors and bacteria.

**FRESH AIR KEEPS YOU
RICH FROM WITHIN!**

FIGHTER

(Best used for Bed Rooms and Office)

PRODUCT FEATURES

Intelligent PM2.5 particle sensor

Real-time display PM2.5 quantitative value

Remind time of changing filter

Child Lock

Touch Control Panel

Change Function with Remote Control

Filter Life 1500 Working Hours

**PM2.5
Sensor**

**EFFICIENT REMOVAL
OF PM 2.5**

Particulates CADR:200m³/h
Particulates CCM: P1

EFFICIENT FILTERS

Pre-filter Activated
Carbon HEPA

**EFFICIENT REMOVAL
ALLERGEN**

Effectively remove PM 2.5, dust,
dust mites, pollen, bacteria, odor,
soot, secondhand smoke and
other air pollution.

**HEPA + Activated
Carbon Filter**

Model No. NVKJ200G-A3B

Weight 5 KG

CADR 200 m³/h

Size (mm) 325*172*542

Voltage 220V Optional

Power 43 W

Applicable Area 8-24m²

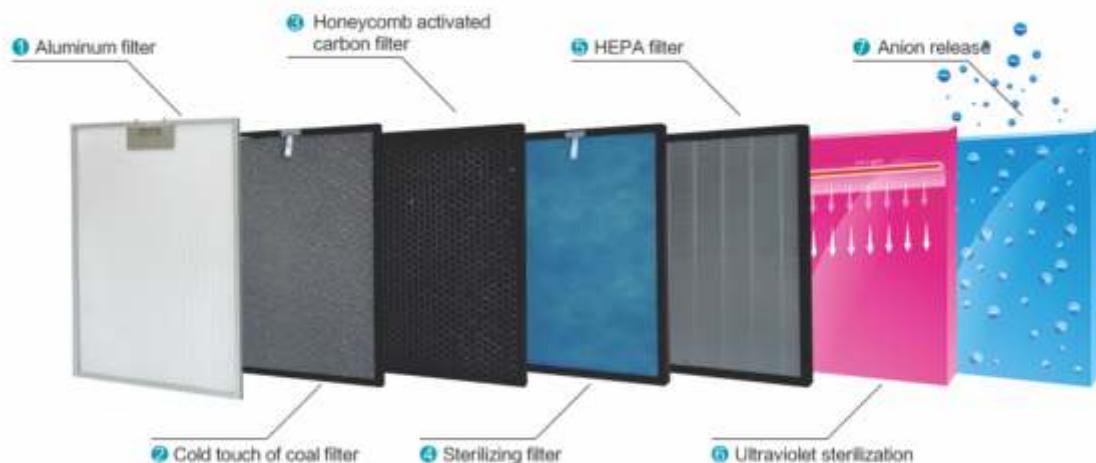

FRESH AIR DRIVES FRESH THINKING!

DOCTOR

(Best used for Hospital, Gymnasium, Living Room, Show Room, School)

1. Aluminum filter

Filter dust particles more than 5 micron meters, can clean many times.

2. Cold touch of coal filter

Absorbing and decomposing formaldehyde, benzene and TVOC.

3. Honeycomb activated carbon filter

Rapidly adsorbing odor, decomposing formaldehyde, benzene, ammonia and second hand smoking.

4. Sterilizing filter

Eliminating floating dust particles, acarid, micro organism

5. HEPA filter

Eliminating mold, dust, allergen and virus

6. Ultraviolet sterilization

Eliminating virus, bacteria and so on quickly.

7. Anion release

Improving air quality, multiple health care functions.

PRODUCT FEATURES

Intelligent PM2.5 Particle Sensor

Real-time Display PM2.5 Quantitative Value

Remind Time Of Changing Filter

Child Lock

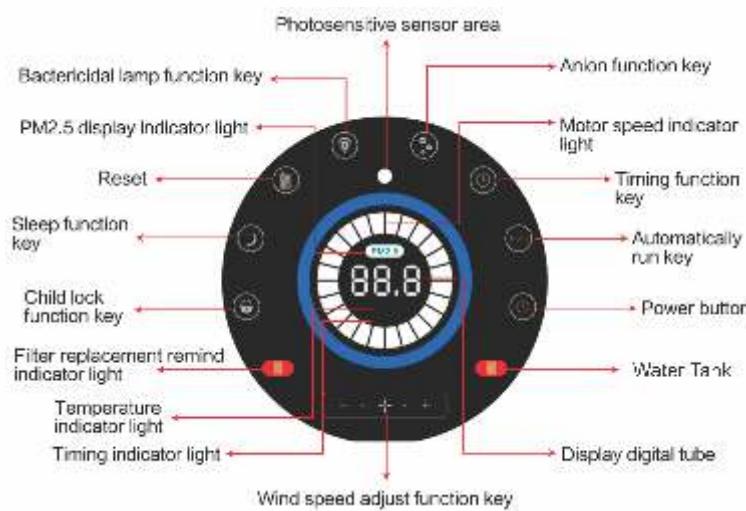

Touch Control Panel

Change Function with Remote Control

Model No.	NVKJ488F-K08A
Weight	10.8 KG
CADR	488 m³/h
Size (mm)	400*230*620
Voltage	220V 50Hz
Power	85 W
Applicable Area	54-80m²
Option	Humidifying Atomization

WATER TANK HUMIDIFICATION FUNCTION

The machine has a humidification function, so that in dry weather condition you can activate this mode:

Benefits of humidification:

1. Increase air humidity and improve breathing quality. Effectively removes smoke, dust and odor so that the air is more fresh.
2. Moisturises the skin and add to beauty.
3. Promote human facial cell blood circulation and metabolism, relieves nervous tension and eliminates fatigue.

PROTECT YOUR PREMISES FROM THE INVISIBLE POLLUTION!

SNIPER

(Best used for Hospital, Gymnasium, Restaurant, Marriage Hall)

GREAT ACCOMPLISHMENTS,
INTELLECTUAL LIFE

DOUBLE FILTER DESIGN, DOUBLE BOOST INTAKE
DOUBLE OUTPUT CLEAN AIR

PRODUCT FEATURES

Intelligent PM2.5 particle sensor

Real-time display PM1.0 quantitative value

Remind time of changing filter

Child lock

Touch Control Panel

Change Function with Remote Control

Model No. NVKJ800F-K15B

Weight 14 KG

CADR 800 m³/h

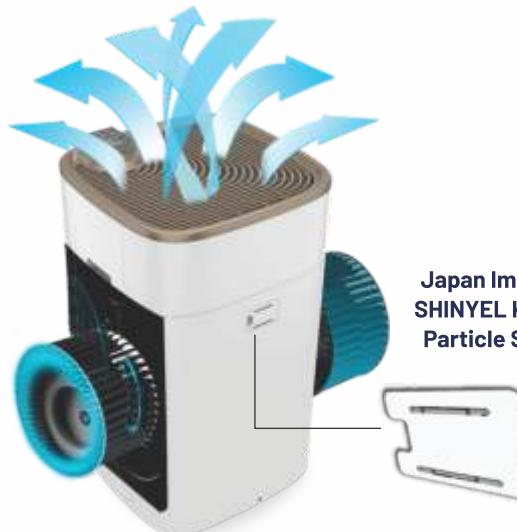

Size (mm) 400*400*665

Voltage 220V 50Hz

Power 75 W

Applicable Area 56-96m²

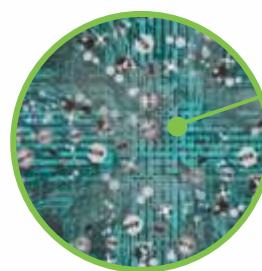

WIND FROM ABOVE. BIG CYCLE

Dual forward wind turbines increase air flow, dislocation blade design
Quickly stirs room air, allowing clean air to flow quickly to every corner

BOTTOM CASTER
WHEEL DESIGN

H12 high-efficiency composite clamp carbon cloth filter
Effective adsorption of formaldehyde,
minimum blocking particles 0.02 microns
(100 times smaller than the upper limit of PM2.5).
